MODULE ACTIVATION

- Supplier** Activating Supplier-related modules
- Product** Activating Product-related modules
- Inventory & Stock** Activating Stock-related modules
- Purchase** Activating Purchase-related modules

STATE CHANGES

- Summary Diagram** The state diagram for “Purchase” related operations

PURCHASE PROCESS

- Supplier Purchase** Recording a Purchase
- Supplier Shipment** Recording a Shipment
- Supplier Invoice** Emitting an Invoice
- Supplier Payment** Paying an Invoice

Chart of Accounts (Recap)

Chart of Account

- We have installed the « French » chart of accounts : refer to « Basic Functionality » document.
- We use the following accounts for the purchase process

Balance Sheet Accounts

#	French	English
41	Fournisseur	Supplier
53	Caisse	Cash

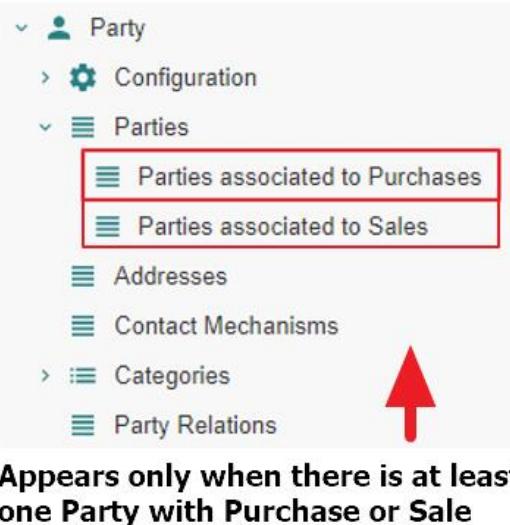

Income Statement Accounts

#	French	English
6x	Charge	Expense

Supplier

Motivation

- Suppliers are named « Parties associated to Purchases ». We name them hereafter « Supplier » for commodity.
- Suppliers are in fact party entity roles : any party promotes to a supplier as soon as one or more purchases are linked to it. Same for sales.
- **Creation** : a supplier can be defined by creating an instance with the Menu Tree Item
 - « Parties » or
 - « Parties associated to Purchases » if it exists (see **Access** hereafter).
- **Access** : as long as no purchase is linked to a party, it is not recognized as a supplier and will only be accessible using the Menu Tree Item « Parties ».
- Note finally that « Party » modules have been activated as explained in the previous document « Basic Functionality ».

Appears only when there is at least one Party with Purchase or Sale

10 - Journals - Periods

Journals - Periods▼

The screenshot shows the Odoo Journals - Periods module. At the top is a toolbar with icons for refresh, back, forward, search, and other actions. Below it is a search bar labeled "Search". The main area has two sections: "FILTERS" on the left with a checkbox for "Journal" and "Period" on the right. To the right of the Period section is a vertical sidebar with a tree view of the menu structure. The "Entries" node is expanded, showing four items: "Journals - Periods", "Open Journal", "Create Move from T", and "Account Moves". The "Create Move from T" item is highlighted with a red box.

Purchase
From State « Quotation » to State « Confirmed » or
From State « Quotation » to State « Processing »

State transitions

- Upon « Confirm » action by the user, a « Sale » or « Purchase » evolves from state « Quotation » to :
 - State « Confirmed » when a latent purchase processing error condition exists
 - State « Processing » when such error does not exist.
- In the present scenario, the error condition consists in the « Product » not being linked to an « Account Category » and the state transition is from « Quotation » to « Confirmed »

Supplier Shipment - State Changes - Actual States

>	Party
>	Company
>	Product
>	Currency
>	Banking
>	Carrier
>	Financial
>	Inventory & Stock
>	Configuration
>	Supplier Shipments

Motivation

It is certainly possible to process the shipment(s) pertaining to a « Purchase » using the « Move » menu item.

However, it is recommended to proceed using the « Supplier Shipment » functionality which will manage the following stock moves in a coherent fashion :

- « Incoming Moves » between the supplier location and the warehouse input location
- « Storage Moves » between the warehouse input location and the warehouse storage location

Note : The « Shipment » information appears to be different depending on the linked-by entity :

- From the viewpoint « Supplier », there is no « Shipment » linked-to anymore
- From the viewpoint « Purchase » there is still a « Shipment » linked-to

3 - Supplier Shipments | Supplier Shipments (SUP01)

A screenshot of the Odoo interface showing the details of a selected supplier shipment. The top navigation bar shows 'Inventory & Stock / Supplier Shipments'. The main area displays form fields for Reference, Number, Supplier, Planned Date, Effective Date, Company, Contact Address, and Warehouse. Below these are tabs for 'Incoming Moves', 'Inventory Moves', and 'Other Info'. The 'Incoming Moves' tab is selected and highlighted with a red box. The 'Incoming Moves' table shows a single row with a red box around the 'State' column.

Journal Period
 Expense 2021-04 - 2021-06

The screenshot shows the 'Journals - Periods' screen in Odoo. At the top, there's a breadcrumb navigation: Financial / Entries / Journals - Periods -. Below it is a toolbar with various icons for actions like creating new journals, printing, and filtering. A 'FILTERS' section allows filtering by journal type (Journal or Expense) and period (2021-04 - 2021-06). To the right, a sidebar shows the full 'Financial' menu path: Party, Company, Product, Currency, Banking, Carrier, Financial, Configuration, Invoices, Payments, Entries, Journals - Periods, Open Journal, Create Move from T, and Account Moves. The 'Journals - Periods' item is specifically highlighted with a red box.

Supplier Invoices
From State « Validated » to State « Posted »

Motivation

<https://www.accountingtools.com/articles/what-is-posting-in-accounting.html>

What is posting in accounting?

December 22, 2020

Posting in accounting is when the balances in subledgers and the general journal are shifted into the general ledger. Posting only transfers the total balance in a subledger into the general ledger, not the individual transactions in the subledger.

An accounting manager may elect to engage in posting relatively infrequently, such as once a month, or perhaps as frequently as once a day.

Subledgers are only used when there is a large volume of transaction activity in a certain accounting area, such as [inventory](#), [accounts payable](#), or [sales](#). Thus, posting only applies to these larger-volume situations. For low-volume transaction situations, entries are made directly into the general ledger, so there are no subledgers and therefore no need for posting.
